VITALY MUKHA
MANUAL QA

I'm a QA Engineer with real project experience in manual frontend testing — working daily with layout, responsiveness, and browser tools. I feel confident in UI testing and web debugging, and I'm also open to backend testing and growing into more technical areas like APIs or automation

EDUCATION

2009 - 2013

Business economics

Dniprovskiy National University named after Oles Honchar

COURSES

Lemon School / Testing (QA)
August 2024 - December 2024

View Certificate

LANGUAGES

- Ukrainian - Native
- Russian - Proficiency
- English - Pre-Intermediate

WORK EXPERIENCE

ScaleFinal, remote - Manual QA   2025 - PRESENT
- Testing web applications with a focus on frontend functionality, layout, and responsiveness
- Collaborating closely with developers and designers via daily stand-ups and direct communication
- Writing clear and structured bug reports, checklists, and documenting test results
- Using ClickUp, Chrome DevTools, Slack, Visual Studio Code, and Octo Browser in daily workflow
- Partially automating routine test flows for sanity checks using basic scripting tools (currently developing skills in test automation)

Traffic arbitrage   2020 - 2025
- Analyzing advertising campaign data to improve effectiveness
- Worked with analytics systems and advertising platforms (Facebook, TikTok Ads, Instagram)
- Tested ad campaigns on mobile devices using Android emulators (BlueStacks, NoxPlayer, Memu) to evaluate performance and display accuracy
- Used anti-detect browsers (Dolphin, AdsPower) to test system stability in multi-account environments

HARD SKILLS

Manual Testing

- UI/UX, cross-browser and responsive layout testing
- Functional, regression, exploratory testing
- Writing clear and structured bug reports
- Client-server architecture understanding
- Testing with and without requirements

Tools & Technologies

- ClickUp, Chrome DevTools, Slack
- Visual Studio Code, Octo Browser
- Android emulators: BlueStacks, NoxPlayer, Memu
- Postman, IntelliJ IDEA (basic level)

Basic Automation (in progress)

- Understanding of test automation concepts
- Created a simple UI test in IntelliJ IDEA
- Exploring entry-level scripting to automate routine checks

Version Control (basic)

- Basic knowledge of Git (commits, branches, clone/pull workflow)
